

Meeting Center Closed

The Meeting Center Is Closed for all meeting, assembly, resource library, and office use until further notice.

For health safety reasons brought on by this rain intense year and the continuous wet basement and floods experience this year, (Bldg 905), the Meeting Center (Jonathan) is closed.

Identified mold verified from test samples in the basement and first floor have brought this about. The Meeting Center will not be used for meetings, office work, or committee work. The closure is temporary while the long term use and future value of the building are evaluated.

The current and future status and our associated plans are being evaluated day by day.
